Profile

A Motivated 3-year computer and communications Engineering student studying at Antonine university, seeking an internship to apply technical skills, gain hands on experience and contribute to real world projects while further developing my professional expertise

---

Projects

Pos System **Oct.2025 – Dec.2025**

- Developed a Point-of-Sale system with product search, cart handling, user login and sale reports
- Designed a relational database to store product inventory, pricing, and transaction history
- Generated automated sales reports to support business decision-making.
- Applied object-oriented programming principles to ensure modular and maintainable code.

Movie and TV Show Tracker **Oct.2025 – Dec.2025**

- Full stack web application that helps the user to track movies TV shows, manage watchlists and monitor what they completed
- Developed RESTful APIs using Express.js to handle user data and watchlists
- Optimized application performance by reducing unnecessary API calls

---
